

# SAFE CAM MOUNT

for Insta360 X2/X3/X4/X4 Air/X5

AEROGEAR.eu

## Warnings

1. SAFE CAM MOUNT is designed to use in temperature range from -25°C to +60°C.
2. Please note the following information regarding the SAFE CAM MOUNT:
  - a. Before adhering to your mounting surface, clean the surface with the provided cleaning wipe. Make sure it is clean, dry, and free of dust and/or debris.
  - b. The adhesive that is attached to the flexible adhesive mount is for one-time use only. DO NOT RE-USE.
  - c. To form a strong bond, press and hold for 60 seconds after adhesion. Make sure to apply pressure.
  - d. Wait a minimum of 24 hours before attaching your camera and using the product.
3. The Safe Cam Mount is designed to be applied to smooth and clean surfaces. Examples include but are not limited to: plastic, painted surfaces, and more.
4. Attaching the Safe Cam Mount to a unevenly curved or protruded surface may negatively impact its performance.
5. The Safe Cam Mount is not waterproof. Be careful when using in environments with water exposure, as the adhesive may lose its effectiveness, compromising the stability of the mount and potentially causing damage to your device.

## WARRANTY

AERO GEAR products are guaranteed against manufacturing defects two (2) years from the original date of delivery.

AERO GEAR sole obligation in the event of such defects during this period is to repair or replace the defective part or product with a comparable part or product at AERO GEAR sole discretion. Except for such repair or replacement, the sale, processing or other handling of this product is without warranty, condition or other liability even though the defect or loss is caused by negligence or other fault.

Damage resulting from use, accident, or normal wear and tear is not covered by this or any warranty!

## What's included

SAFE CAM  
A) MOUNT

ADHESIVE  
B) VELCRO

BUNGEE  
C) ROPE

ALCOHOL  
D) WIPE

## Installation instructions

1. Find ideal place for A) SAFE CAM MOUNT on your helmet (record trial video). Make sure that you will choose central part of your helmet without vents, holes or bumps!
2. Clean helmet surface with the D) ALCOHOL WIPE. Wait until surface get dry.
3. Place first B) VELCRO on chosen area. Apply pressure just in the middle, keep corners unsticked.
4. Place second B) VELCRO next the first one so there won't be any gap between them.
5. Apply pressure on the both B) VELCROS so they will follow shape of your helmet. For full glue adhesion wait minimum 24 hours.
6. Test holding force of B) VELCRO by snapping A) SAFE CAM MOUNT from the helmet.
7. If you decided to use C) BUNGEE ROPE to secure your camera, adjust length of it so it will be stretched when attached to your helmet.
